

ProdigyFinance

UPDATE

AVAILABLE MARKETS FOR 2021

Prodigy Finance was founded on the philosophy that funding shouldn't be a barrier to education. Since 2007, we have given out over \$1b in loans and helped 20,000 students achieve their dreams of studying abroad. We are proud to support international students from more countries than any other current lender.

We've made it our mission to make quality education accessible, by redefining the student loan market. We provide loans by raising funds from a varied group of investors and then turning those into loans. This model allows us to provide loans based on future potential, instead of focusing on a student's current financial situation. But it means we have to abide by the criteria set by our investors, including the markets the funds can be used for.

We endeavour to work with a diverse community of investors to provide loans to as many different markets as possible. On page 2 is the list of countries we are proud to be able to support in 2021.

But we're not done yet. We want to invest in every international student, and will continue to seek new funding for a wider range of markets in future academic years. [Get in touch](#) if you want to be kept informed as funding becomes available for more markets.

20,000+ students
have trusted us to fund
their education

900+ schools
we work with worldwide

\$1billion
of loans funded to date
